Evaluation Theories and Models

\$99.00 (Normally \$600.00)

Prerequisites – Knowledge of evaluation

Length – 6 weeks

Start Date – May 6th, 2019

If you want to strengthen, ground, and expand your evaluation practices, this course is for you!

This course provides an overview of five common evaluation approaches:

- Utilization-focused evaluation
- Practical participatory evaluation
- Theory-driven evaluation
- Realist evaluation, and
- Transformative evaluation.

By the end of this course, you will be able to:

1. Explain how evaluation theories and models contribute to improved evaluation practice.
2. Recognize four families of evaluation theories.
3. Describe the characteristics of five widely used evaluation approaches, and,
4. Identify considerations in selecting an evaluation approach.

Register [Here](#)

With the support of an experienced evaluator, the course enables you try out each approach and reflect on the fit between the approach, your own practices, and the contexts in which you work.

If you have any questions please contact the facilitator and professional development chair Ryan Catte at pd_ces@evaluationcanada.ca
